

Vida del Mar Scholarship Program Mission

Mission Statement

The Vida del Mar Condominium Association Scholarship program recognizes and fosters academic achievement, career development, and community service by the children of Vida employees through financial assistance for educational purposes.

In remodeling the program several principles or issues need to be considered and determined including:

1. Will the program be an entitlement program or competitive in design?
2. Will the program be need based or merit based?
3. What will be the duration of the award and will it be automatically renewable?
4. Who will be the target population? In this context will the program target a particular educational grade level or levels?
5. What is the long-range vision for the program?
6. What is the program calendar and operational timeline?
7. How is award eligibility to be determined and according to what criteria?

The first step in the remodeling of the program is to create the organization/committee that will provide oversight for the program and address the immediate demands of continuing the program through 2006. The changes will be scheduled for the 2007 award cycle.
